

Manga Sachhith

+91 8008296246 | sachhithanandm@gmail.com | GitHub | Hyderabad, India

Education

MIT Manipal July 2023 – May 2027 B.Tech in Computer Science & FinTech | CGPA: 7.67 | 6th Semester GPA: 8.67

FIITJEE Junior College, Hyderabad Apr 2020 – May 2022 Intermediate Senior Secondary – State Board | Score: 95.1

Bharatiya Vidya Bhavan Sainikpuri Kendra Apr 2010 – May 2020 Secondary School 10th Grade | Score: 90.8

Technical Skills

Languages: Java, Python, C, SQL, JavaScript

Frameworks & Libraries: Spring Boot, React, JavaFX, Bootstrap, FastAPI, Node.js familiar, Express familiar

AI/ML & Data: Pandas, NumPy, Scikit-learn, XGBoost, LightGBM, NetworkX, PyTorch Geometric, MLflow

Databases: PostgreSQL, Oracle DB, MySQL, MongoDB familiar

Web Technologies: HTML, CSS, Vite, Tailwind CSS, REST APIs, JWT Authentication

Tools: Git, GitHub, VS Code, Eclipse, Postman, Spring Initializr, Vercel, Docker, GitHub Actions

Core Concepts: Data Structures Algorithms, OOP, Unit Testing Debugging, Agile Development, API Design

Cloud & DevOps: Vercel Deployments, Docker, GitHub Actions, AWS familiar, MLOps Basics

Projects

FRIX – Financial Risk Intelligence Fraud Detection Platform *Python, Spring Boot, React, PostgreSQL*

- Building an AI-powered fintech risk intelligence platform to detect suspicious transactions, mule account behavior, and fraud-ring patterns.
- Implemented fraud scoring workflows using Python, Pandas, NumPy, Scikit-learn, XGBoost/LightGBM, and imbalanced classification techniques.
- Designed graph-based suspicious account analysis using NetworkX and PyTorch Geometric to identify mule accounts and transaction chains.
- Developed Spring Boot REST APIs with PostgreSQL, JWT authentication, and a React dashboard for fraud monitoring and analyst review.

InvestWise – Investment Advisory Backend

Java, Spring Boot, Oracle DB

- Developed RESTful APIs using Spring Boot to support investment advisory workflows and structured financial data handling.
- Integrated Oracle DB using controller-service-repository architecture for clean separation of business logic and persistence.
- Tested and debugged API endpoints using Postman; documented request/response contracts for maintainability.
- Applied OOP principles and modular backend design to support scalable future feature additions.

KropKraft Innovation Platform

React, Vite, Vercel | Live

- Built and deployed a responsive web platform for an agri-innovation startup using React, Vite, and modern CSS practices.
- Designed reusable UI components and improved page responsiveness across desktop and mobile devices.
- Configured Vercel production deployment and performed integration testing/debugging for stable releases.

Virtual Mutual Fund Advisor App

Java, JavaFX

- Built a JavaFX desktop application simulating mutual fund advisory logic, investment calculations, and user flows.
- Modeled users, funds, and advisory workflows using object-oriented design; debugged UI and business logic issues through testing.

Certifications

NSD Certified Basics of Information Security ISAC Manipal in collaboration with Cyberange | [Credential Link](#)

NSD Certified Forensics Investigator ISAC Manipal in collaboration with Cyberange | [Credential Link](#)
